Finished width is the total width of all panels and does not include any hinges. Please see product approval drawings for dimensions of hinges, storm bar brackets, etc. Use height chart below to select your finished height. Width can be any size up to 136", but the minimum width for any one panel is 8". There are 8 different hinge configurations (plan views). Please select one for each opening. #1, 4 & 6 are for single panel sides and #2, 3, 5, 7 & 8 are for doubles (byfolds). Please see planview chart (located on product approval drawings). All single planviews will have louvers out when open and flat side out when closed. For byfolds, #'s 2 & 5 have the flat side out when closed but #'s 3, 7 & 8 have louvered side facing out in both the open AND closed position. Please note also that different plan views have different gaps (buildout) so keep in mind when choosing plan views. Storm bars may be used in place of z-bars at the top or bottom of the shutter (but not both). Storm bars will be placed approx. 12" from top or bottom according to the drawings. Drawings can be found on our website at www.crocinorthamerica.com.

Colonial Height Chart

finished height must be one of the measurements to the right. There are no in between measurements as each blade adds 1.875 in. to the height.
