

# UNI-BOX System

**NEW**

The image displays an exploded view of the UNI-BOX System components. On the left, a large, complex metal shutter box is shown in an exploded state, revealing its internal structure and various mounting points. To its right is a square metal plate with several circular holes and a central larger hole. Below these are several smaller components, including a white plastic connector, a metal bracket, and a metal strip. The entire assembly is set against a dark blue background with a subtle gradient.

**The first shutter box  
with ambidextrous side frame**
